VERMONT BIRD CHECKLIST

This checklist contains all the regularly occurring species found in Vermont based on records since 1973. Dates of occurrence are median arrival and departure dates and are indicated by numbers for the months and by A, B, C, or D for the weeks of the month. For example, 3C indicates presence in the third week of March. Species known to breed within the state are marked with an \* (asterisk). Rarities, new breeding records, and regularly occurring species outside their expected date range should be reported to the Vermont Bird Records Committee: www.vtecostudies.org/vbrc
